

The ICAC's 80th Plenary Meeting

Dr Mohamed Negm

Dr. Mohamed Negm is a Professor at the Cotton Research Institute, Giza-Egypt, and has contributed research activities in all cotton improvement programs as well as in fibre breeding, ginning, fibre technology and spinning for nearly 30 years.

In 2015 he was awarded a patent for 'Developing a DNA-Based Technology for Identifying the Presence of Egyptian Cotton Fibers in Various Textile Products' and 10 years earlier, he was presented with the Nation's Encouragement Award in Advanced Scientific Technology from Egypt's Ministry of Scientific Research and Technology.

At the International Cotton Researchers Association, Dr Negm serves as Chairman as well as the Chief Editor of ICRA's 'Cotton Innovations' newsletter.
