

ACTION PLAN

To achieve PSAC objectives in 2024

(subject to change as per ICAC's Plenary meeting schedule)

Unfortunately, we don't have a date set for the ICAC plenary meeting. There is a possibility that it may be held together with World Cotton Day. It is recommended to work with a deadline of September 2024.

February and mid - March 2024

- Finalizing and approving PSAC objective for 2024.
- Finalizing action plan.

Possible presentations

- Meet with NCC contact for a presentation of EU regulations on man made fibres and natural fibres.
- Meet with Cotton Incorporated for a possible presentation to discuss environmental impact of natural fibres vs man made fibres.
- A possible presentation on the background, market share, price comparisons between natural fibres and man- made fibres. Can be arranged from ICAC.
- We need to try to get someone from one of the big companies, e.g. Lenzing as a producer or different types of performance fibre.
- On polyester, we could ask Stephen Chen or Justin Huang from Taiwan Textile Federation.

April – July 2024

- 2 meetings of each committee to finalize their recommendations/ comments/ concerns.

August 2024

- Finalizing the recommendation amongst PSAC Executive Committee.
