* The top number in each row equals the quantity of raw cotton exporters report having shipped to each importer. The bottom number in each row equals the quantity importers report having received from each exporter. For example, in 1984/85, Argentina reports exports to China (Taiwan) of 20,730 tons; China (Taiwan) reports imports from Argentina of 19,740 tons. Imports may differ from exports for a given season because of time spent in transit, changes in the weight of cotton during shipment, transhipment through third countries and errors in record keeping.

1/ Data on exports by Paraguay and Zimbabwe during 1984/85 are not available.

* The top number in each row equals the quantity of raw cotton exporters report having shipped to each importer. The bottom number in each row equals the quantity importers report having received from each exporter. For example, in 1989/90, Argentina reports exports to China (Taiwan) of 10,400 tons; China (Taiwan) reports imports from Argentina of 10,000 tons. Imports may differ from exports in a given season because of time spent in transit, changes in the weight of cotton during shipment, transhipment through third countries and errors in record keeping.

* The top number in each row equals the quantity of raw cotton exporters report having shipped to each importer. The bottom number in each row equals the quantity importers report having received from each exporter. For example, in 1994/95, Australia reports exports to Japan of 89,000 tons; Japan reports imports from Australia of 90,110 tons. Imports may differ from exports in a given season because of time spent in transit, changes in the weight of cotton during shipment, transhipment through third countries and errors in record keeping.

* The top number in each row equals the quantity of raw cotton exporters report having shipped to each importer. The bottom number in each row equals the quantity importers report having received from each exporter. For example, in 1999/00, Australia reports exports to Japan of 136,400 tons; Japan reports imports from Australia of 131,250 tons. Imports may differ from exports in a given season because of time spent in transit, changes in the weight of cotton during shipment, transhipment through third countries and errors in record keeping.

* The top number in each row equals the quantity of raw cotton exporters report having shipped to each importer. The bottom number in each row equals the quantity importers report having received from each exporter. For example, in 2004/05, Australia reports exports to Japan of 43,770 tons; Japan reports imports from Australia of 44,350 tons. Imports may differ from exports in a given season because of time spent in transit, changes in the weight of cotton during shipment, transhipment through third countries and errors in record keeping.

* The top number in each row equals the quantity of raw cotton exporters report having shipped to each importer. The bottom number in each row equals the quantity importers report having received from each exporter. For example, in 2009/10, Australia reports exports to Japan of 18,190 tons; Japan reports imports from Australia of 17,830 tons. Imports may differ from exports in a given season because of time spent in transit, changes in the weight of cotton during shipment, transhipment through third countries and errors in record keeping.

* The top number in each row equals the quantity of raw cotton exporters report having shipped to each importer. The bottom number in each row equals the quantity importers report having received from each exporter. For example, in 2014/15, Australia reports exports to Japan of 12,190 tons; Japan reports imports from Australia of 10,820 tons. Imports may differ from exports in a given season because of time spent in transit, changes in the weight of cotton during shipment, transhipment through third countries and errors in record keeping.
